DGA

« Le soutien à notre industrie de Défense, notamment pour la promouvoir et en faire valoir le potentiel sur d'autres marchés domestiques et à l'export, est l'un des axes majeurs de l'action de la Direction générale de l'armement (DGA) et du ministère de la Défense. Votre initiative pour valoriser la surveillance aéromaritime, cette filière technologique d'excellence totalement duale, revêt ainsi un sens particulièrement pertinent. »

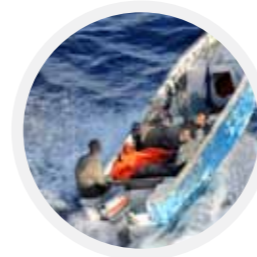

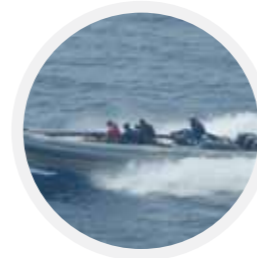

Laurent Collet-Billon

Délégué général pour l'armement

“Support for our defence industry and particularly for promoting and asserting its potential in other domestic and export markets is one of the major areas of action of the French Defence Procurement Agency and the Ministry of Defence. Your initiative to showcase airborne maritime surveillance which is a technological branch of excellence with complete dual purpose is particularly relevant.”

Laurent Collet-Billon

Chief executive of the French Defence Procurement Agency

Worldwide, crisis situations are on the increase and immediate reaction is essential. The stakes are extremely high: financially, technically, environmentally and sometimes in terms of human cost. The integration and exploitation of data from various sensors means that understanding of complex situations and targeted responses within an operational context can be optimised. Under the patronage of the Chief Executive of the French Defence Procurement Agency, ACE offers you the chance to meet with the best players in the field with presentations of the most advanced modern technology in operation particularly on board drones

This first international airborne surveillance showcase on 9 and 10 December at the private Castellet airport aims to become a recurring event. We hope that you will benefit from the very best contact opportunities. Catherine Maunoury, twice winner of the World Aerobatic Championships, will be giving an impressive show.

François André

PROGRAMME

9 December 2014

09h45 : [Opening](#)

10h30 - 11h00 : [Official Ceremony](#)

11h30 - 12h00 : [Demonstration flights](#)

12h00 - 14h00 : [Cocktail Lunch](#)
